THE STORY

The products of Haftsache have a special origin. They are produced by prisoners in Bavarian prisons. Made with careful handwork they are characterized by the very best materials and first-class quality - genuine craftsmanship.

Prisoners are part of society, though they spend time behind bars, they will eventually be released. These prisoners are preparing for the work of successfully entering society again while still in prison. Whoever buys a Haftsache, makes an important contribution to the successful reintegration of prisoners.

Deeply rooted in traditional handicraft, individual items of everyday use are created in the workshops of Bavarian detention centers. The products of Haftsache are very important to the fact that the prisoners not only produce, but also become creative themselves and actively shaping the goods. The handmade articles are not bulk goods which are produced on the production line. Each product is manufactured from the initial designs to completion. Thus, in every Haftsache there is not only genuine craftsmanship, but also a piece of the personal history of the prisoner who has worked on it.
